

THREE THINGS TO KNOW ABOUT

CIRSIUM BIOSCIENCES

ONE ♦

WE HAVE REIMAGINED AAV, USING PLANTS NOT BIOREACTORS.

**AAV manufacturing should
scale with your program.**

By using plants as bioreactors for
upstream production, our platform
helps deliver consistent, predictable
scale and reduces bottlenecks as
manufacturing needs evolve.

See How Our Process Works In 2 Minutes:

Plants are grown in tightly
controlled vertical farm systems

50k sq. ft. production facility in
San Diego

Highly-skilled team of AAV &
plant biologic experts

TWO ♦♦

WE PARTNER ACROSS THE GENE THERAPY FIELD.

No single organization moves gene therapy forward alone.

Our team partners across the ecosystem, from early-stage innovators to established developers, to move gene therapy programs forward on their milestone paths.

Our Platform Serves:

Gene
Therapy
Developers

Patient
Advocacy
Groups

Academic
Research

Technology
Innovators

Public Partnerships:

THREE 

**WE MEET
YOU WHERE
YOU ARE.**

The platform serves AAV manufacturing needs across production need and size.

By scaling with plants, our platform serves as a tool to scale efficiently no matter where your program needs are.

Our platform makes it easy for developers to start with us, all we need is:

**START A
CONVERSATION
ABOUT WHAT'S
NEXT FOR YOUR
PROGRAM.**
